

NOTHING ACTIVATES THE BRAIN SO EXTENSIVELY AS MUSIC

- Dr. Oliver Sacks

MEDRhythms is A Neuro-Rehab Company positioned at the intersection of neuroscience & music.

Goal areas we treat

- Sensorimotor
- Speech & Language
- Cognition

Where we work

- Inpatient
- Outpatient
- In-Home
- Group Homes / Nursing Homes
- Day Programs

Settings

- Individual
- Group
- Co-Treat with PT/OT/SLP

Populations we serve

- Traumatic Brain Injury
- Alzheimer's Disease
- Parkinson's Disease
- Autism
- Stroke
- Huntington's Disease
- Multiple Sclerosis
- Cerebral Palsy
- Other neurologic diseases

We provide world-class, life changing care through the power of neurologic music therapy. Neurologic injury and disease threatens to steal millions of our loved ones lives each year.

Music activates cognitive, motor, and speech centers in the brain through accessing shared neural systems. Treatment techniques are based on the scientific knowledge of music perception and production and the effects of this treatment on nonmusical brain and behavior functions.

Based on neuroscience research, we apply music as a unique tool in neuro-rehab to facilitate and maximize neuroplasticity.
